Process Recording A Tool for Student Education

Process Recording is a specialized, highly detailed form of recording everything that takes place in an interview, as opposed to summary recording where only highlights are noted. Process recording is used almost exclusively as a teaching/learning tool in field instruction.

Some purposes and uses of process recording:

- 1. Allows the field instructor to get an idea of how the student is functioning and to identify where effective techniques are being used and where guidance may be needed.
- 2. Helps the student conceptualize his/her approach to professional practice;
- 3. Increases the student's self-awareness and helps him/her differentiate between factual data and his/her own gut-level reactions and judgments as to what is occurring in relation to the client.
- 4. Provides students with an opportunity to develop an objective analysis of what took place during an interaction with a client.
- 5. Assists students in concentrating on what clients say and how they behave throughout the interview.
- 6. Helps develop student's assessment skills and conscious use of self.
- 7. Helps alleviate some student anxiety about having responsibility for a client by keeping the field instructor informed of work with clients.
- 8. Permits the field instructor to be aware of key dynamics that may affect the entire case situation if the beginning student is required to even record transactions that she/he considers to be unimportant.
- 9. Permits the field instructor to intervene in situations that a beginning student may be unable to handle.
- 10. Allows student, field instructor, and faculty liaison to observe and evaluate the student's progress over time.
